## The New Xerox Synergix 721p Wide Format Print/Copy/Scan System

### It's a Quantum Leap in Digital Technology!

At 22 Ds per minute, the 4 roll Synergix Print System 721p lets you do more, at greater speeds with better results than ever before. It consistently delivers superb images, even at the highest monthly volumes. But that's not all. The speedy Synergix Print System 721p is affordable, setting a new standard in the industry. It's priced up to 50% less than similar but slower alternatives, and it's 100% effective use of toner significantly lowers costs.

### It's Fast and Productive

Print at 22 "D's" size (24" x 36") prints per minute... that's 220 prints in just 10 minutes, a full 500 ft roll in only 12 minutes! For non-stop operation, the system automatically alerts you to low toner and media... add toner, as well as media, on the fly, without pausing the printer. It's easy to preload media since the printer ships with an extra spindle. Copy and Scan with the Xerox Synergix Scanner at 7.3 inches per second!

### Superb Print Quality

Xerox DocuSharp™ print technology combined with the powerful Xerox 512MB AccXES® controller assures excellent 256 grayscale image quality with clean diagonals and curves, crisp fine lines and smooth well-defined grayscales. DocuSharp technology automatically applies extra "mini-pixel" image data to improve visual appearance, and in the case of diagonals and curves, reduce "stairstepping". For fine control, DocuSharp Technology can be applied in four levels of intensity, user-selectable at the printer.

### Low Total Cost of Operation (TCO)

Lower total cost of ownership with less downtime equals higher return on investment. The single component developer system with its 100% toner utilization increases yield, reliability and print quality — and lowers T.C.O. even more. And your Synergix Print System 721p provides uptime so reliable, it's a new standard for the industry.

- ✓ **22 "D" size prints per Minute**
- ✓ **Superb solids, fine lines and shadings**
- ✓ **Low Toner Cost, Very High Yields**
- ✓ **A New Standard for Reliability**
